

ASCENT CHARLEY FRAC

We will soon be starting frac ops on the Charley Pad. **We will be staging frac traffic on the Beacon Pad.** There will be personnel on the Beacon directing traffic over to the Charley. **CB Channel 27** will be used for frac traffic communications.

From the Charley drivers will turn left on to Hill Road and then make another left onto the Charley lease road. The pads are within line of sight of one another. Please obey the Ascent posted speed limits on Hill Road and take your time between the Domino and Beacon Pads. **Water trucks will be entering the Charley pad to turn around, go back out the lease road to the AST and be spotted into the offload area from the lease road.**
